SUMMARY

Integrated **B.Tech–M.Tech Computer Science Engineering** student specializing in **Cyber Security** with **GATE CSE** qualification and strong core CS fundamentals. Possesses an industry-aligned cybersecurity skill set with hands-on exposure to real-world threat scenarios, including **threat analysis, vulnerability assessment, digital forensics**, and **incident response** aligned with **NIST CSF and ISO/IEC 27001 principles**, with familiarity in **MITRE ATT&CK** mapping. Known for an analytical, investigation-driven mindset with foundational **SOC** and **incident response** experience, applying a security-first approach to system, network, and application security.

INTERNSHIPS

- Cyber Security & Digital Forensics UK Ltd.**
Project Head – Cybersecurity & Innovation | Oct'25 - Jan'26
Conducted cybersecurity research and contributed to threat analysis and digital infrastructure protection initiatives.
- Redynox**
Cybersecurity Intern | Aug'25 - Oct'25
Assisted in vulnerability identification and supported cybersecurity awareness and risk mitigation activities.
- Elevate Labs**
Cyber Security Intern | May'25 - Jun'25
Worked on real-world cybersecurity projects focused on threat detection and defensive security practices.

KEY ACHIEVEMENTS & CERTIFICATIONS

- Qualified GATE CSE 2025**, demonstrating a strong grasp of core Computer Science fundamentals and readiness for advanced engineering studies.
- BECIL Level 1 Certification** – Foundational cybersecurity & digital evidence handling.
- 4-week OSINT Certification** Course “**CTRL ALT ACT**” by **Cyber Secured India**, covering OSINT techniques, investigation workflows, and practical case studies.
- Acmegrade Cyber Security Trainee** - Completed structured training in cybersecurity fundamentals, including networking principles, threat detection techniques, and practical exposure to security tools.

EDUCATION

B.Tech - M.Tech CSE Five- Year Integrated Course (with specialization in **Cyber Security**) **2022 - Present**
National Forensic Sciences University, Delhi Campus - **Institute of National Importance** under **MHA**
Current PPI - 9.06/10.00

SKILLS

Security: Incident Response, Threat Analysis, Vulnerability Assessment, Web Application Testing, Security Monitoring, Traffic Analysis, Log Analysis, Risk Assessment, Memory Forensics, Disk Imaging, OSINT Techniques, SOC Fundamentals, Attack Surface Analysis, Network Fundamentals (TCP/IP, OSI Model), ISO/IEC 27001 Foundations, NIST CS Framework, Information Security Laws and Regulations, MITRE Attack Mapping
Tools: Wireshark, NMap, BurpSuite, Autopsy, FTK Imager, Volatility, Windows Event Viewer, OWASP ZAP, Nessus, Metasploit, Netcat, Linux
Programming: Python, C/C++, Bash Scripting, Powershell, HTML/CSS/JS
Professional Skills: Analytical Thinking, Problem Solving, Incident Documentation, Structured Problem Solving

PROJECTS

 github.com/satvikTT

- AI-Based Intrusion Detection System (AI-IDS)**
Developed a machine learning-based Intrusion Detection System for network traffic analysis and attack classification, aligned with SOC monitoring practices and MITRE ATT&CK techniques.
- Email Phishing Simulation**
Designed a phishing attack simulation framework to evaluate social engineering risks and strengthen organizational security awareness in line with defensive security best practices.
- Password Strength Checker**
Built a credential security assessment tool to analyze password entropy and detect compromised credentials, aligned with secure authentication standards and cyber risk mitigation practices.
